Continuation Sheet (PTOL-303) 10/082,321

Application No.

Continuation of 2. NOTE: Applicant's current amendments to the independent claim will require further consideration and search by the Examiner. Applicant has newly amended the claim to recite a method of forming spacers in a displaying device comprising at least two micro-display units wherein a set of at least two masks are formed for a respective one of the at least two micro-display units and comprising a number of shielded zones, where the designs of the masks are related to one another such that the shielded zones of each mask in the set of masks are positioned in such a way to avoid overlapping of the shielded zones of the other masks of the set. Such newly claimed limitations result in spacers of one of the at least two micro-display units positioned in a non-overlapping fashion with the spacers of another of the at least two micro-display units (Amended steps 3 and 4 of independent claim 6).
